DD/A/ODP WEEKLY REPORT to the shore Store S.
Week of 21-28 October 1981 6 K
AHT
Major Activities During the Past Week:
A. Support to ODP:
PEGASUS (Minicomputer Database on Terrorist Events). We met
with representatives of the DDO and NFAC to discuss approaches for improving support of the Agency's terrorism bases. Our discussion
centered on the need to improve PEGASUS response time and the long
range prospects of combining PEGASUS and FITE into one "central-ized" database system.
MPS (Message Processing System). An enhanced version of skeleton MPS was installed in Production Control Branch (PCB) on
19 October. This version constitutes the "baseline", and is considered the prerequisite of Bulk Data Services (BDS) being
accepted PCB.
GRAPHICS. AUI Data Graphics has submitted the Extendable
Charting Option (ECO) draft user's manual for agency review.
Included in the manual is a sample ECO session and examples of all of the ECO chart types.
B. Support to OICE:
<u>CAMS</u> (COMIREX Automated Management System) 25X1 briefed the CAMS2 P/S schedule to the T/S Configuration Control
Board. Particular emphasis was on the ICT (Installation, Check-
out, and Test) portions of the CAMS2 Phase I to Phase II trans- ition plans.
The CAMSTACK (CAMS Color Graphics capability) planning and
development responsibilities were shifted this week to the CAMS1
Group. We received notice also that there is increased interest in this capability on the part ofoperations. 25X1

## Approved For Belease 2005/11/06 F. CTA-RDP84-00933R000400210045-8

	C. Support to OTE:	
25X1	OTRTEST (Evaluation of Achievement and Proficiency Tests) The OTE mark sense reader used as an input device to OTRTEST will be interfaced with VM through a Tektronix graphics terminal. OTE will have the mark sense reader modified under their maintenance contract.	
	D. Support to OF:	
25X1	ACIS (Automated Compensation and Information System) The General Functional Requirements Document for the ACIS system has been accepted by the Office of Finance as a baseline document.	
	II. General Items:	
25X1	for a briefing on the physics underlaying the TRACE program. Dave agreed to modify the OSWR contract with TASC for a portion of Dave	25X1
	time for a TRACE support task.	25X1
	III. Problems:	
25X1	PERHOSP, CAPER. The Ames building air handler chiller developed a coil leak over the weekend of 17-18 October. As a result, the Microdata 8000 and the 6000 had to be powered down overnight.	
	Office of Personnel was not able to produce their CAPER reports on schedule; a subsequent computer room power problems caused one day to be lost on PERINSUR development.	25X1
